

COMPACTION ROLLERS

Our Compaction Rollers are manufactured within the ISO 9001: 2000 quality system and conform to the various International Standards.

We manufacture the complete range of rolls for the compaction of rope or strand. The rolls can be made from high grade toolsteel, hardened & tempered, or Tungsten Carbide.

The groove profile is uniquely constructed to give a seamless finish.

We also manufacture Bearing Housings and Shafts

Please contact our technical desk for further information regarding this product range.
